SUMMARY

Associate Software Engineer with 3.5 years of experience developing and validating **Manufacturing Execution Systems (MES)** for pharmaceutical manufacturing. Specialized in **Java**-based backend development for Rockwell Automation's **FactoryTalk® PharmaSuite (FTPS)** and **Tulip MES**, with strong expertise in test automation, validation, and GxP-regulated environments. Proven contributor in **SAFe Agile** teams, delivering high-quality, compliant software through robust development and automated testing practices.

PROFESSIONAL EXPERIENCE

- Rockwell Automation** May '25 — Present
Associate Software Engineer Pune, India
- Developed and enhanced **Java-based backend** components for FactoryTalk® PharmaSuite (FTPS) MES, supporting **pharmaceutical manufacturing workflows in GxP-regulated environments**.
 - Automated functional and regression test scenarios using the **Marathon Test Automation Tool**, while designing and executing detailed **Test Designs & Cases**—improving test coverage and ensuring compliance.
 - Collaborated within a **SAFe (Scaled Agile Framework)** feature team, actively participating in sprint planning, daily stand-ups, retrospectives, and PI planning to deliver incremental value.
- Tata Consultancy Services** Jun '24 — May '25
MES Developer Analyst Pune, India
- Acted as the **Tulip (MES) SME**, providing the development, enhancement, and integration of **Tulip-based MES solutions in GxP-regulated environments**.
 - Designed and implemented **user access management strategies** for a global pharmaceutical client with 400-500 users across 9 sites, incorporating GxP-oriented roles and site-specific user groups.
 - Conducted **impact analysis** for Tulip MES upgrades, ensuring **seamless transition to LTS versions, Maintaining uptime, performance, and SLA compliance**
- MES Developer** Sep '22 — May '24
Pune, India
- Developed and deployed **MES applications for Weighing & Dispensing, Tableting, and Packaging** operations.
 - Created and maintained **Tulip Tables** to optimize **data storage and reporting for real-time production monitoring**.
 - Delivered **validated software solutions** that met **GxP compliance standards**, ensuring high-quality and reliable performance.

EDUCATION

- Bachelor of Engineering in Computer Science & Engineering**, G.H. Raisoni Institute of Engineering and Technology, Nagpur (GPA: 8.21) Aug '18 — Aug '24
Nagpur, India
- Graduated with a strong foundation in software development, database management, and web technologies, with a passion for solving complex problems through system integrations.

CERTIFICATIONS

- Tulip Essential Certification**, Tulip Interface
- Tulip Advanced Application Building Certification**, Tulip Interface

PROJECTS

- Digital Manufacturing Solutions for Pharmaceutical Production**, Tata Consultancy Services Present
- Designed and implemented MES solutions to automate and optimize **manufacturing workflows**, reducing downtime and enhancing production efficiency.
 - Integrated Tulip MES applications with **enterprise systems (SAP, Tulip environment, AWS S3, Google Workspace)** for real-time operational insights.
- Shopfloor Management Application for Pharmaceuticals**, Tata Consultancy Services
- Developed a shopfloor management solution integrated with SAP, streamlining **batch execution, reporting, and compliance tracking**.
 - Improved process efficiency and compliance by **automating manual workflows** and **ensuring real-time monitoring**.

SKILLS

- Tools & Technologies** Tulip Tables, Connectors, Tulip MES, Tulip Integrations, FTPS MES, Marathon
- Programming & Tools** Java, JavaScript, SQL, Git, RESTful API
- Service Now** Incident Management, Application support, Change Management, Problem Management, SLA compliance
- Methodologies & Domains** SAFe (Scaled Agile Framework), Manufacturing Execution Systems (MES), Pharmaceutical Manufacturing Lifecycle
